

# Tip 9

## Install and maintain your water feature and pond to recycle water

Relax and enjoy the beauty and tranquility of a water feature in your own garden.

Our staff understand water, pumps and biofilters. If you are planning to install a water feature, contact your local Water Pros store to discuss your requirements.

Many of our water features are uniquely different, catering for indoor and patio fountains without splash, small garden areas to large features for both home and commercial installations.

# Saving Water

## 10 tips for maintaining a green garden while saving water

We will help you plan your water feature so it works properly and does not waste water. We carry a large range of pipe, hoses and fittings to make the job easy and as water efficient as possible.

We also carry pond additives to help you to maintain your pond in pristine condition and improve the health of your pond, fish and aquatic plants.

We stock a range of garden lighting to make the most of your water feature and pond, so it can also be viewed and enjoyed at night.

If you would like to install a water feature or pond ask a Pro – a Water Pro – Ph: 1300 660 111
